

DIGITAL  
ROLL-UP

*iBanr* is the world's first **4K, UHD or HD digital roll-up** that can be assembled in **one minute** and stored in a suitcase!

Welcome to the 21st century!

This **innovative** concept was **selected twice** at the world's largest electronics show — **CES in Las Vegas** — in **2019 and 2020**, among 1,000 startups worldwide.

INSTALLATION  
IN 1 MINUTE

CONNECT SEVERAL IBANR  
UNITS TO FORM A VIDEO WALL

# iBanr

## Designed in France

iBanr is **designed in France**, in our workshops located in the Hauts-de-France region.

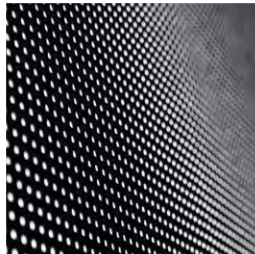

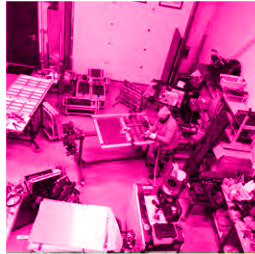

This new product positions us as the **first company in the world** to offer 4K, UHD, or HD LED screens that can be folded and transported.

DESIGNED IN FRANCE

MADE IN TURKEY

THE ONLY LIMIT  
TO COMMUNICATION IS  
YOUR IMAGINATION.

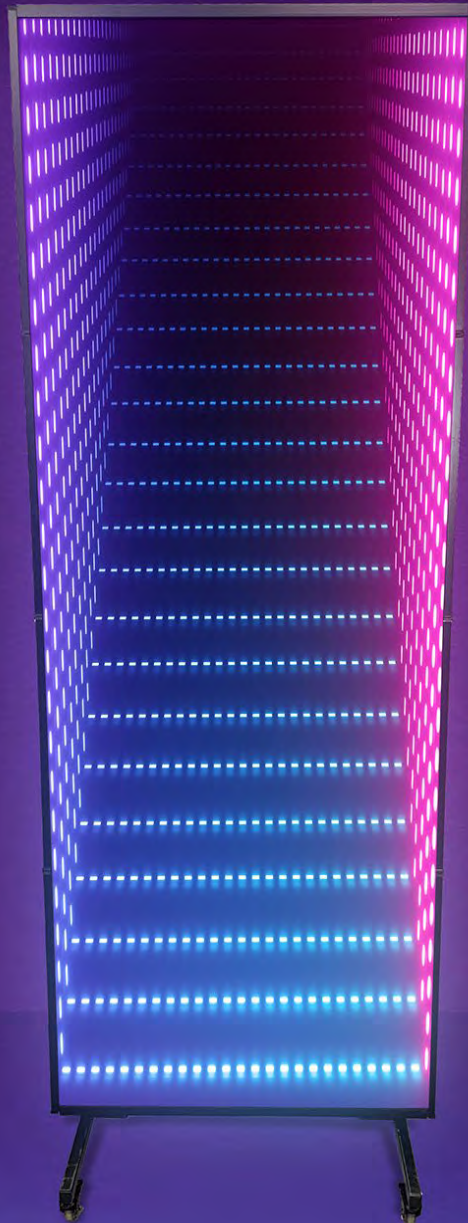

INSTALLATION  
EN 1 MINUTE

**One minute** is all it takes to take the iBanr out of its carrying bag, unfold it, and set up the safety features. The screen is **plug-and-play** — just plug it in and press the **ON** button.

TRANSPORTABLE  
EN VOITURE

Once folded, the *iBanr* is easy to transport in its specially designed wheeled bag. In its carrying case, the screen measures 53 cm in height and 70 cm in width. **The iBanr fits perfectly in the trunk of any car — or even in an airplane's overhead compartment.**

Its 192 cm by 64 cm screen is available in **4K, UHD, or HD**. The iBanr offers one of the finest displays on the market. The durable LED delivers **exceptional visibility from over 50 meters**, outstanding contrast, and easy maintenance.

PROGRAMMABLE  
VIA TÉLÉPHONE

The content displayed on the iBanr can be programmed as you wish via the **mobile app ViPlex Handy** (iOS, Android). Setting up your content for real time broadcasting is quick and easy. Your smartphone, tablet, or computer becomes a mini Wi-Fi video control room for your events.

ASSEMBLABLE

You can connect multiple *iBanr* units to create a seamless video wall, **with no visible edges**. Simply link the screens using an HDMI cable — the content programmed on one screen will automatically display on the others at the correct size. **Up to five screens can be combined**, offering a **total display area of 6.15 m<sup>2</sup>!**
